

**When you make an investment to improve your process, let us play a role in your success.**

# Capitalize On Your Investment

## Selecting The Right Fluid For The Right Application Is Crucial To Your Bottom Line

**The metalworking fluid you use will play an important role to ensure that your machine performs as designed.**

With QualiChem's expertise in metalworking fluid technology, you can rest assured that you are using the correct fluid for your machine and gaining maximum machining productivity.

QualiChem manufactures a comprehensive line of the highest performing cutting and grinding fluids on the market today. We deliver breakthrough advancements in fluid technology to maximize productivity and reduce manufacturing costs.

Our experienced engineers can tell you which characteristics are best suited for all combinations of materials, machines and processes as well as other special considerations to identify the best product for your application.

**Please contact us for a free evaluation of your process.**
