

With QualiChem's XTREME aerospace approved fluids, your productivity will take flight.

## XTREME Performance

### Meeting the Exacting Standards of the Aerospace Industry

QualiChem's XTREME aerospace-approved cutting and grinding fluids are designed for the most difficult machining applications.

- ▶ Compatibility with all common aerospace materials including aluminum, titanium, heat resistant nickel alloys and alloy steels
- ▶ Maximum metal removal rates
- ▶ Reduction in coolant consumption due to improved sheeting action
- ▶ Improved oil rejection due to a tighter emulsion
- ▶ Improved cleanliness on parts and machinery
- ▶ Elimination of foam in high-pressure applications
- ▶ Excellent in-process corrosion protection for parts and machinery
- ▶ Consistent performance and extended sump life
- ▶ High operator acceptance

#### XTREME CUT 290

Boeing Aircraft Corporation (BAC 5008)  
Lockheed Martin F16, F22 & F35  
Lord Corporation MTL-S-0136-001  
Pratt & Whitney PMC 9372  
Safran (Messier Bugatti Dowty) PCS-4002  
UTC Aerospace Systems

#### XTREME CUT 250C

Boeing Aircraft Corporation (BAC 5008)  
Bombardier Aerospace BAMS 569-001  
Lord Corporation MTL-S-0136-001  
Pratt & Whitney PMC 9158

#### XTREME COOL 365C

Boeing Aircraft Corporation (BAC 5008)

#### XTREME COOL 335

Boeing Aircraft Corporation (BAC 5008)

# Peak Productivity. Precision Parts.

QualiChem's XTREME cutting and grinding fluids meet the ever-increasing productivity demands in the aerospace industry while maintaining material integrity, performance at the point of cut, and operator-friendly aesthetics.
